

Maxibit Original 8 & Demo, Foldables

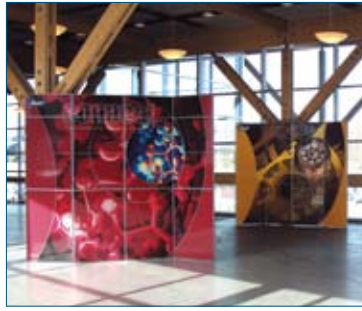

Maxibit Original 8

Original 8 is the first, true portable marketing display. Everything from Roll-up displays to Super-sized fabric displays all have a strong connection to and owe their existence to this ingenious foldable display. The Original 8 consists of a number of panels, each 70x100 cm, that are bound together by a unique Maxibit patented hinge. When combined with Original 8's exclusive Maxibit patented profile, the system will allow everyone the ability to create any number of variations and permutations with the single system. From towers to arcades, showcases and high walls, the versatility of the system has been proven time and time again. Furthermore, the front mounting, double sided panels, with super thin frames, make it easy to mount images, while the range of accessories available for the system means you can creatively develop your perfect display. You can adapt your system to any environment and, after your successful trade fair or business meeting, can easily pack the entire system into its carry case, with the graphic panels protected in their frames.

Maxibit Demo

Demo is a surprisingly flexible system that allows your creativity to flow. Its primary feature includes a patented 360 degree hinge, which allows for fluid movement of its aesthetically pleasing, light weight, Aluminium frame. The versatility of the system grants you the flexibility to expand and reduce, reconfigure and reshape the entire system using a simple allen key and stacking pins. Its low cost belies its super high quality and provides the user with a ultra effective, cost efficient marketing tool. Using only an allen key, its single sided images, all 70x100 cm, are mounted directly into the frame and, at the end of the day, the entire system can be packed into a nylon carry bag, or dismantled and placed into tubes to allow for portability and cost effective shipping.

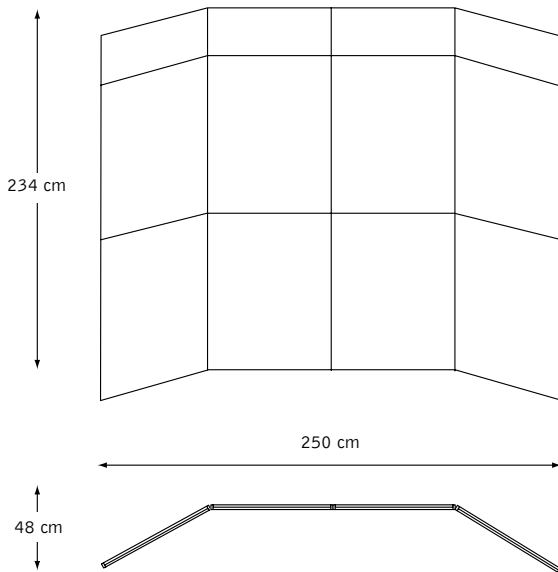

Why choose a foldable:

- Original 8 – the world’s first patented foldable
- Engineered for quality, such as steel hinges
- Extensive accessory programme
- Great flexibility
- Very easy to use
- Universal format
